Education

WestCliff University (King's College)
Bachelor of Computer Science, GPA: 3.95/4.0

Kathmandu
May 2024 – May 2028

Training and Experience

AI Strategist Mar 2026 – Present
Creative Strategy Alchemy Remote

- Applied AI role within a marketing agency, evaluating and integrating AI tools across the creative pipeline: LLM copywriting, and AI image, video, and audio generation
- Built a Python ad-generation pipeline orchestrated with GitHub Actions, integrating with StefanBrain (an agentic AI marketing platform) via API with a human review step before publishing
- Benchmarked generative AI tools for ad creative and experimented with AI-driven ad spend optimization
- Built Shopify landing and product pages as part of broader technical ownership

AWS Machine Learning Engineer Trainee July 2026 – Present
TEKBAY

- Ongoing part-time apprenticeship in applied machine learning and AWS ML tooling, working toward the AWS Certified Machine Learning Engineer – Associate (MLA-C01) certification

Software Engineering Intern Nov 2025 – Feb 2026
Quark Infotech Kathmandu

- Built modular REST APIs with NestJS, TypeORM, and PostgreSQL; integrated React/TypeScript admin dashboard
- Designed scalable CMS backend architecture with cloud storage integration (OSS/S3)
- Led CartNxt e-commerce platform — full-stack ownership from API design to frontend, projected 1M+ NPR in transactions
- Implemented DB migrations, reusable DI-based modules, and post-deployment testing

Cloud Apprentice May 2025 – July 2025
Adex International Lalitpur

- Hands-on training across AWS and Azure: EC2, Lambda, S3, VPC, IAM, Azure resource management
- Deployed infrastructure projects applying AWS Well-Architected and cloud-native principles
- Provisioned secure VPN infrastructure using Terraform IaC

Technical Writer & Content Reviewer Apr 2023 – Apr 2025
Gadgetbyte Kathmandu

- Published 250+ technical reviews; drove 29% SERP improvement and 2M+ social impressions

Technical Skills

Languages: Python, JavaScript/TypeScript, Java, C/C++, SQL
Frontend: React, TypeScript, HTML/CSS, Tailwind CSS
Backend: FastAPI, NestJS, Django, Flask, Node.js, Express
AI Engineering: RAG Pipelines, LLM API Integration, Embedding Search, Agentic Systems, Long-term AI Memory
Cloud: AWS (EC2, Lambda, S3, VPC, IAM), Terraform IaC
Database & DevOps: PostgreSQL, SQLite, Docker, Docker Compose, Git, REST APIs, OOP, DI

Certifications

AWS Certified Machine Learning Engineer - Associate (MLA-C01) 2026
Amazon Web Services Ongoing
AWS Certified Solutions Architect - Associate 2025
Amazon Web Services Verify
CS50AI — Introduction to Artificial Intelligence with Python 2025
Harvard University Certificate
Java Programming 2026
DataCamp Certificate
CS50P & CS50X 2023 – 2024
Harvard University

Projects

Siksak (AI Tutor) | *Python, FastAPI, PostgreSQL, RAG, Docker, React/TypeScript* 2026

- Built full-stack Retrieval-Augmented Generation (RAG) system with embedding-based semantic similarity search
- Architected modular backend separating LLM orchestration, memory persistence, retrieval pipeline, and service layers
- Developed React/TypeScript frontend for conversational AI interface with real-time streaming responses
- Implemented long-term conversational memory stored in PostgreSQL with structured metadata management
- Containerized backend, frontend, and database using Docker Compose for reproducible deployment

Invisible VPN | *AWS, Terraform, Infrastructure-as-Code* 2025

- Provisioned secure VPC-based VPN infrastructure using Terraform
- Configured IAM roles, security groups, and networking policies following cloud best practices

EK-thal | *Django, PostgreSQL, Full-Stack Development* 2025

- Developed full-stack food redistribution platform during 48-hour hackathon (Django backend + frontend)
- Implemented authentication, ORM-based data modeling, and responsive UI components
